

AMWUA Monitors HB2573

[HB2573: Cities; Water Softeners; Salts](#)

HB2573 would permit cities and towns to regulate the use, installation and disposal of water softening devices that discharge sodium into a water or wastewater system.

Cities and Towns already have powers to regulate for public health and safety, including by charter, this would include water softening devices.

Sponsor: Representative Mason

Last action: Referred to House Water and Energy. Hearing Scheduled 2/4
